

Water Supply Intake Protection Areas

Shapefile

Tags

environment, intake, drinking water supply, protection areas, delineations, New Hampshire, NH

Summary

This dataset is used by the New Hampshire Department of Environmental Services (NHDES) in setting priorities for drinking water protection activities.

Description

Water Supply Intake Protection Areas (WSIPA) are critical lands adjacent to public water supply intakes on surface waters. This polygon shapefile contains WSIPAs for community drinking water supplies.

Use limitations

User is required to read metadata completely before using the data. The information provided in this coverage is a subset of spatial databases developed by NHDES. Development of these databases is an ongoing project. They may not contain all existing and potential sites, stations, or threats. NHDES is not responsible for the use or interpretation of this information, or for any inaccuracies in the site names, tax map and lot information, or locations. All information is subject to verification. These data are to be used for planning purposes only. Distribution is discouraged.
